STRUCTURAL PEST CONTROL SKILLS PROGRAMME

New exciting training program for the Pest Control Service Industries Board.

The PCSIB is proud to announce that we are now presenting a new Skills Development short course. The course is designed to meet the needs of those both new to Pest Control and experienced individuals looking to update their skills.

We are conscious that although those involved in Pest Control are first and foremost the guardians of public health, many still regard pest control officers as simply "rat catchers".

Pest Control today is both complex and highly regulated. Controlling target species without affecting the health of non-target species or damaging the environment takes both knowledge and skill.

With this in mind the new three day course 'Structural Pest Control' has been added to our training portfolio.

About the programme

The Certificate provides an understanding of pests in domestic, commercial and industrial environments and their control. Mixing and preparation of Pesticides as well as the safety measures to be taken.

It meets the criteria as set out by the AgriSETA and fulfils the legal requirements relating to the training of Pest Control officers as per regulation 2(3)(c) Section 10 of Act 36 of 1947.

Teaching and assessment

The programme covers:

- * Explanation, Application and Exercising health, safety and first aid,
- * Legislation
- * Rodent, Cockroach, Ant, Flea and Termite control,
- * Mixing and preparing Pesticides
- * Use Pesticide application, safety and protective equipment.
- * and the life skill 'problem solving'

Career progression

Whilst not intended solely for people working in Pest Control, those who are or who are intending to be so employed will be better equipped to carry out their professional duties safely, efficiently and humanely.

Duration

3 days hands-on training, followed by a monitoring process of six months. After completion of this monitoring process the candidate will be assessed on competency.

Enroll now and receive your P-Registration number with the Dept of Agriculture in 6 months time.

Hi, I'm Joe the PCO journey with me in this new Skills course, to improve your Pest Control skills!
